

FILUMART

SAMPLE B2B PRODUCT KNOWLEDGE BASE

Reference corpus for the Junior AI Engineer RAG Machine Assessment

DATASET ID	RECORDS	PURPOSE
FILU-SAMPLE-RAG-2026	9 products • 4 suppliers	Orientation only; not the scored test corpus

Why you are receiving this sample

Use this compact, fictional catalog to understand the kinds of facts a B2B RAG system may need to retrieve: product attributes, supplier relationships, prices, minimum order quantities, technical notes, restrictions, and facts that are not documented. Build your solution so the same structure can support a larger, unfamiliar corpus.

What is included

Section	Contents
Product catalog	Nine fictional SKUs covering packaging, warehouse handling, commercial refrigeration, and textile machinery.
Supplier directory	Four suppliers with headquarters, categories, service regions, and indicative lead-time ranges.
Technical bulletins	Short source documents that clarify limitations and product-specific details.
Terminology and data notes	Aliases, units, commercial rules, source IDs, and intentional information gaps.

Catalog index

Category	Product IDs
Packaging equipment / consumables	PKG-120, PKG-220, PKG-CF48
Warehouse storage / handling	WHS-1800, WHS-1000, WHS-400
Commercial refrigeration	REF-320, REF-700
Textile machinery	TEX-12

Important

All names, prices, specifications, suppliers, and IDs in this sample are synthetic. Do not treat prices as live quotes or infer inventory. The separate assessment catalog and evaluator test pack are not represented by this sample.

01 | Packaging Equipment & Consumables

Product facts are deliberately structured; relevant limitations may appear again in a technical bulletin.

PKG-120 | CartonPro 1200 Semi-Automatic Carton Sealer

Packaging equipment • Supplier: PackRight Systems (SUP-PKG-11)

Attribute	Documented value
Function	Applies pressure-sensitive tape to close the top and bottom flaps of an already erected carton.
Carton range	Width: 150–500 mm; height: 120–600 mm.
Throughput	Up to 18 cartons/minute under suitable operating conditions.
Power	0.38 kW; 230 V AC; single-phase.
Tape	Compatible tape width: 48–72 mm. Tape is not included unless listed on the purchase order.
Dimensions / mass	950 × 850 × 1,450 mm; 370 kg.
Warranty	6 months against manufacturing defects in covered parts.
Commercial	Indicative price: ₹78,000/unit • MOQ: 1 unit • Typical lead time: 10–15 working days.

PKG-220 | FlexWrap 220 Turntable Pallet Wrapper

Packaging equipment • Supplier: PackRight Systems (SUP-PKG-11)

Attribute	Documented value
Function	Semi-automatic stretch wrapping of palletized loads.
Pallet range	800 × 1,200 mm through 1,200 × 1,200 mm; maximum pallet height: 2,200 mm.
Load / output	Maximum load: 2,000 kg; up to 20 loads/hour depending on wrap program and operator workflow.
Film / pre-stretch	Machine stretch film; nominal pre-stretch setting up to 250%.
Power	2.2 kW; 415 V AC; three-phase.
Dimensions / mass	Turntable diameter: 1,650 mm; machine mass: 610 kg.
Warranty	12 months against manufacturing defects in covered parts.
Commercial	Indicative price: ₹1,24,000/unit • MOQ: 1 unit • Typical lead time: 10–15 working days.

PKG-CF48 | ClearFilm CF-48 LLDPE Stretch Film

Packaging consumable • Supplier: PackRight Systems (SUP-PKG-11)

Attribute	Documented value
Format	Transparent linear low-density polyethylene (LLDPE) pallet stretch film.
Roll specification	500 mm width × 300 m length; nominal thickness: 23 microns; gross roll mass: 15 kg.
Use	Manual or compatible machine pallet wrapping.
Packing	12 rolls per carton.
Compliance note	Food-contact certification is not stated in this dataset.
Commercial	Indicative price: ₹920/roll • MOQ: 24 rolls • Typical dispatch range: 4–7 working days.

Retrieval tip

Questions may use phrases such as “carton taping machine,” “pallet stretch wrapper,” or “plastic wrap for pallets.” A robust system should map these terms to the right record while preserving distinctions between the machine and the consumable.

02 | Warehouse Storage & Material Handling

Pay attention to the unit of measure: per bay, per unit, total load, and MOQ are not interchangeable.

WHS-1800 | StackStore 1800 Selective Pallet Rack Bay

Warehouse storage • Supplier: Docklane Material Handling (SUP-WHS-21)

Attribute	Documented value
Rated load	1,800 kg uniformly distributed load (UDL) for the entire bay.
Dimensions	2,400 mm width × 1,100 mm depth × 4,000 mm height.
Configuration	Four beam-supported storage levels; powder-coated steel frame.
Installation	Concrete-floor suitability must be checked before installation.
Anchoring	Anchor bolts are required but are sold separately; they are not included in the listed bay price.
Warranty	24 months against manufacturing defects in covered components.
Commercial	Indicative price: ₹36,500/bay • MOQ: 2 bays • Typical lead time: 7–14 working days.
Important note	The 1,800 kg rating applies to the whole bay, not to each shelf or level.

WHS-1000 | LiftMate 1000 Manual Hydraulic Stacker

Warehouse handling • Supplier: Docklane Material Handling (SUP-WHS-21)

Attribute	Documented value
Rated capacity	1,000 kg.
Lift / forks	Maximum lift height: 1,600 mm; fork length: 1,150 mm; lowered fork height: 90 mm.
Movement	Manual hydraulic lift; nylon front wheels; turning radius: 1,400 mm.
Mass	215 kg.
Warranty	12 months against manufacturing defects in covered parts.
Commercial	Indicative price: ₹48,900/unit • MOQ: 1 unit • Typical lead time: 7–14 working days.

WHS-400 | MoveEase 400 Platform Trolley

Warehouse handling • Supplier: Docklane Material Handling (SUP-WHS-21)

Attribute	Documented value
Rated capacity	400 kg.
Platform	900 × 600 mm steel deck.
Wheels	Four polyurethane (PU) wheels: two swivel wheels with brakes and two fixed wheels.
Mass	23 kg.
Warranty	6 months against manufacturing defects in covered parts.
Commercial	Indicative price: ₹6,800/unit • MOQ: 4 units • Typical lead time: 7–14 working days.

Safety and interpretation

Do not divide a bay-level load rating across shelves unless a source explicitly gives per-level ratings. Do not state that rack anchors are included. For installation-specific advice, cite the documented requirement and recommend confirming site conditions with the supplier.

03 | Refrigeration & Textile Machinery

Similar-looking commercial appliances may have opposite temperature ranges and different intended uses.

REF-320 | FrostHarbor CF320 Chest Freezer

Commercial refrigeration • Supplier: PolarNest Commercial Cooling (SUP-REF-31)

Attribute	Documented value
Capacity	320 L gross volume.
Temperature	Operating range: −18 °C to −24 °C under suitable ambient and loading conditions.
Electrical	230 V AC, 50 Hz; rated input: 160 W.
Refrigerant / defrost	R600a refrigerant; manual defrost; one storage basket; lockable lid.
Dimensions / mass	1,020 × 620 × 850 mm; 46 kg.
Warranty	Compressor: 24 months; other covered parts: 12 months.
Data gap	Daily energy consumption in kWh is not provided.
Commercial	Indicative price: ₹28,900/unit • MOQ: 2 units • Typical lead time: 8–18 working days.

REF-700 | PolarVault VC700 Upright Display Chiller

Commercial refrigeration • Supplier: PolarNest Commercial Cooling (SUP-REF-31)

Attribute	Documented value
Capacity	700 L gross volume.
Temperature	+2 °C to +8 °C under suitable ambient and loading conditions.
Cooling / electrical	Forced-air cooling; 650 W rated input; 230 V AC, 50 Hz.
Refrigerant / layout	R290 refrigerant; double-glazed self-closing door; five adjustable shelves.
Dimensions / mass	800 × 740 × 2,050 mm; 118 kg.
Warranty	Compressor: 24 months; other covered parts: 12 months.
Use limitation	Not described as a medical-grade refrigerator in this dataset.
Commercial	Indicative price: ₹74,500/unit • MOQ: 1 unit • Typical lead time: 8–18 working days.

TEX-12 | StitchPro ST-12 Industrial Straight-Stitch Sewing Machine

Textile machinery • Supplier: LoomCraft Industrial Machinery (SUP-TEX-41)

Attribute	Documented value
Stitch type	Single-needle, single-thread straight lockstitch.
Speed / stitch	Maximum 4,500 stitches/minute; stitch length up to 5 mm.
Needle / motor	DB×1 needle system; 550 W servo motor.
Included items	Table and stand included; online operator orientation included. Extra presser feet are not included.
Suitable material	Medium-weight woven fabrics for standard garment work.
Not suitable for	Heavy leather work or embroidery; it is not an embroidery machine.
Warranty	12 months against manufacturing defects in covered parts.
Commercial	Indicative price: ₹29,800/unit • MOQ: 2 units • Typical lead time: 5–10 working days.

Temperature distinction

REF-320 is the frozen-storage product (−18 °C to −24 °C). REF-700 is the chilled display product (+2 °C to +8 °C). Do not interchange these temperature ranges or imply a medical-use certification.

04 | Supplier Directory & Commercial Rules

Supplier details are separate records linked to products by supplier ID. Multiple products may share the same supplier.

Supplier ID / Name	Headquarters	Products / category	Regions / lead-time note
SUP-PKG-11 PackRight Systems Pvt. Ltd.	Pune, Maharashtra, India	Packaging machines and stretch film	India and UAE. Equipment usually 10–15 working days; film typically 4–7 working days.
SUP-WHS-21 Docklane Material Handling	Bengaluru, Karnataka, India	Pallet racks, stackers, platform trolleys	India. Typical product lead time: 7–14 working days. Installation availability depends on site and region.
SUP-REF-31 PolarNest Commercial Cooling	Ahmedabad, Gujarat, India	Commercial freezers and display chillers	India and Sri Lanka. Typical lead time: 8–18 working days.
SUP-TEX-41 LoomCraft Industrial Machinery	Coimbatore, Tamil Nadu, India	Industrial sewing machines	India and UAE. Typical lead time: 5–10 working days.

Commercial interpretation rules

Field	How to interpret it
Indicative price	Synthetic reference price in INR. GST, freight, installation, and negotiated discounts are excluded unless stated otherwise.
MOQ	Minimum order quantity for the stated selling unit (unit, bay, roll, or other specified measure).
Lead time	Typical working-day range, not a guaranteed delivery date and not proof of current availability.
Warranty	Read the precise coverage and duration. Compressor and other-part warranties are listed separately for refrigeration units.
Missing field	If stock, an exact delivery date, a certification, or a consumption value is not documented, say that the dataset does not provide it.

Example questions this structure should support

- “Which supplier sells a 1,000 kg manual stacker, and what is its maximum lift height?”
- “Find a freezer for –20 °C storage and give its capacity and compressor warranty.”
- “Which packaging product uses 48–72 mm tape, and does it erect cartons automatically?”
- “Compare two warehouse handling products by capacity, price, and minimum order quantity.”
- “Is the listed stretch film certified for food contact?” A reliable answer should state that this is not documented.

Do not hard-code these records

The system should retrieve facts from ingested documents or structured records. Product IDs, supplier IDs, terminology, and the product mix here are only examples of the kinds of metadata and relationships the system may encounter.

05 | Technical Bulletins, Terminology & Source Map

Some answers require combining a product record with a bulletin or supplier record. These notes are part of the same sample corpus.

PR-TECH-07 | Packaging operation note

PKG-120 is semi-automatic: an operator positions and feeds an already erected carton, and the machine applies tape to close it. It does not erect cartons. Compatible tape width is 48–72 mm. Tape is not included unless listed on the purchase order.

WHS-SAFE-04 | Rack loading and anchoring

The WHS-1800 rating is 1,800 kg UDL for the entire bay. It is not a per-shelf rating. Anchor bolts are required and sold separately. The installer must verify concrete-floor suitability before the rack is used.

POLAR-OPS-02 | Refrigeration use note

REF-320 is intended for frozen storage and is documented at −18 °C to −24 °C. REF-700 is a chilled display unit documented at +2 °C to +8 °C. Temperatures depend on ambient conditions and loading. Daily energy consumption is not provided, and REF-700 is not described as medical-grade equipment.

LOOM-TECH-03 | Sewing-machine suitability

TEX-12 is a straight lockstitch machine for medium-weight woven fabric. It is not an embroidery machine and is not specified for heavy leather work. The table and stand are included; extra presser feet are not included. Online operator orientation is included.

Useful terminology and aliases

Canonical concept	Equivalent wording candidates may use
PKG-120	Carton sealer; carton taping machine; case sealing machine; box sealing equipment.
PKG-220	Pallet wrapper; stretch wrapping machine; turntable wrapper; pallet film wrapper.
PKG-CF48	Pallet wrap; stretch film; LLDPE wrapping film; plastic film roll.
WHS-1800	Selective pallet rack bay; warehouse rack; pallet storage rack.
WHS-1000 / WHS-400	Manual stacker / hydraulic stacker; platform trolley / warehouse cart.
REF-320 / REF-700	Chest freezer / frozen storage; upright display chiller / commercial beverage chiller.
TEX-12	Straight-stitch machine; industrial lockstitch; garment sewing machine.

Source and metadata conventions

- Product IDs identify SKU-level facts; supplier IDs identify supplier-level facts; bulletin IDs identify additional technical or usage constraints.
- A strong response should show citations or source names that let a user trace an answer to the product card, supplier directory, or bulletin.
- Normalize units carefully: millimetres (mm), kilograms (kg), litres (L), kilowatts (kW), volts (V), degrees Celsius (°C), and working days.
- When sources specify different scopes (whole-bay load versus per-level load; compressor versus other parts), preserve the scope instead of merging values.

Intentional information gaps

This corpus does not provide live stock, exact dispatch dates for a specific order, tax-inclusive landed cost, daily energy use for REF-320, food-contact certification for PKG-CF48, or a medical-grade certification for REF-700. Do not invent an answer for any of these.
